Request to Waive Age Requirement

The Bachelor of Applied Science (BAS) degree program is specifically designed for adult learners, age 25 and older, who have obtained an Associate’s in Applied Science (AAS) degree with a minimum GPA of 2.0. Ideally the program is best suited for students who have been out of school for at least 7 years and may have some work experience. However, we realize that life circumstances may not always follow this path. If you are interested in one of the BAS concentrations listed below, but do not meet the age requirement, you must complete this form in its entirety.

Instructions: Please complete this form in its entirety.
1) Submit one letter of recommendation from an academic advisor or professor at your current institution who can attest to your character and academic abilities.
2) Select which concentration you are requesting this waiver for.
3) Submit a statement (150 – 250 words) as to why the “age requirement” should be waived.
4) Sign and date this form.
5) Submit this form with the required documents (items #1, #2 and #3) to the BAS Office.
